

Built-in (Standard Library) Functions in C – Syntax & Examples

printf()

Syntax: printf("format string", variables);

```
#include <stdio.h>
int main() {
    printf("Hello World");
    return 0;
}
```

scanf()

Syntax: scanf("format string", &variables);

```
#include <stdio.h>
int main() {
    int a;
    scanf("%d", &a);
    return 0;
}
```

strlen()

Syntax: strlen(string);

```
#include <stdio.h>
#include <string.h>
int main() {
    char s[] = "C Language";
    printf("%lu", strlen(s));
    return 0;
}
```

sqrt()

Syntax: sqrt(number);

```
#include <stdio.h>
#include <math.h>
int main() {
    printf("%f", sqrt(16));
    return 0;
}
```

malloc()

Syntax: ptr = (type*) malloc(size);

```
#include <stdio.h>
#include <stdlib.h>
int main() {
    int *ptr = (int*) malloc(5 * sizeof(int));
    free(ptr);
    return 0;
}
```

isalpha()

Syntax: isalpha(character);

```
#include <stdio.h>
#include <ctype.h>
int main() {
    char c = 'A';
    if(isalpha(c)) printf("Alphabet");
    return 0;
}
```
